

STONES & MORE

Golden Age Collection

Installation Instructions

1. After grout application, immediately remove grout with damp sponge
2. Gently remove excess grout without scrubbing or making multiple passes
3. Using a dry cloth, clean surface again

Cleaning Instructions

- Do not use acids, alkaline, strippers or solvent based sealers/cleaners on the brass
- Avoid using harsh chemicals to clean the surface
- Pieces should be cleaned with a damp soft cloth and dried with a clean cloth

Disclaimers: If pieces are damaged due to the use of acids, alkaline, strippers or solvent based sealers/cleaners, or any other harsh chemicals, they cannot be repaired or replaced.

All metal can scratch and dent.

It is NOT recommended using mosaics containing brass or metal in wet areas, where there is consistent moisture or submerged in water. This includes, but is not limited to, showers, steam showers, fountains and pools
